VIDLEARN® VCOS

VIDLEARN® PARTNER SCHOOLS

We invite you to become a **VID**LEARN® Partner School and benefit from the following:

- Free VCOS installation into one of your classrooms.
- Access to all recorded lessons for reflective practice.
- Access to free CPD SKE courses across the shortage subjects for your teachers.
- Opportunity of offer placements and recruit through our National Teacher Training Online programme.

VCOS

The **VID**LEARN® Classroom Observation System (VCOS) is a state-of-the-art approach to classroom observation. Using four high-definition cameras we can unobtrusively capture lessons live in the classroom without disturbing the normal dynamic of a typical lesson. This offers schools a unique insight to enhance teaching and learning. Recordings from all lessons are available within 24 hours in quad-screen or individual camera playback in high definition using our bespoke player. Access to these recordings is secured within a highly controlled platform and monitored to ensure that these are only accessed by authorised staff.

Teachers and school leaders can view these recordings outside of the normal confines of lesson observations to fully reflect on teaching and learning. Reflection and evaluation are crucial skills in modern teaching and a VCOS installation is an invaluable tool that can lead to a school-wide collaborative and collegiate approach to teaching and learning.

HOW IT WORKS

The VCOS installation and maintenance is totally free to the school. The relationship works in that both parties benefit as follows:

- The school gets a state-of-the-art video classroom to use for teacher training, teacher observations, reflective practice, CPD and whole school/partnership training.
- **VID**LEARN® would use some of the VCOS recordings to support our SKE and ITT courses (teachers in the classroom get the option to delete any recordings for whatever reason).
- The installation and maintenance of the system would be free to the participating school.
- Partner schools would also be able to access our CPD SKE for free for participating staff.

NATIONAL TEACHER TRAINING ONLINE

Partner schools will also have the opportunity to join our wider partnership of schools offering placements for the National Teacher Training Online programme. Here trainees complete their ITT school placement within the school fully supported by online tutors and our ITT online package. Classroom observations take place in the VCOS classroom and schools receive a placement fee for supporting the trainee during the ITT year.

CDP SKE

Teachers that contribute to VCOS will get access to free GCSE focus SKE courses in the following subjects:

- Mathematics
- Physics
- Chemistry
- Biology
- English
- Geography
- French
- Spanish
- Computer Science

CAN I SEE A DEMO?

Yes, please contact us for more information (see back page).

WHAT HAPPENS NEXT?

You can contact us via the information below and we can have a chat over the phone to discuss your requirements.
